

CodeBody Dynamics LLC

Capabilities Statement

CodeBody Dynamics delivers software, AI, mobile, web, and cloud systems for enterprise and government teams that need senior engineering depth, fast execution, and long-term maintainability.

Core Capabilities

- Enterprise AI integration and intelligent automation
- Native and cross-platform mobile applications
- Web platforms, portals, and internal systems
- Cloud backend systems and infrastructure architecture
- Enterprise integration, APIs, and low-code alignment
- Federal contracting and proposal support

Differentiators

- Senior engineering depth shaped by Fortune 500 and healthcare delivery
- Small-business responsiveness with direct access to decision-makers
- Production-ready systems built for scale, security, and reliability
- Experience across modernization, greenfield work, and integration-heavy delivery

Key Personnel Experience

Delivery experience of the founder and key personnel, gained prior to and alongside the formation of the company. Listed as key personnel qualifications, not as contracts performed by CodeBody Dynamics LLC.

- Fortune 500 retail: iOS delivery on a large-scale consumer platform
- Healthcare and pharmacy platforms with compliance-sensitive workflows
- Enterprise modernization and integration-heavy delivery
- Municipal and utility IT operations proposal development

Company Past Performance

CodeBody Dynamics LLC was formed in November 2023. The company is building its federal past performance record and does not yet hold completed federal prime contracts. References available on request for commercial engagements.
